

Put the Checkbook Away!

**We're Not Going to Ask You for Money –
Not Now – Not Later – Not Ever!**

We help businesses everyday improve their bottom line by utilizing our expertise in negotiating best energy prices for electricity and natural gas, in markets where electricity and natural gas are deregulated.

**We routinely find savings of 5% to 30%.
On a few occasions we've provided savings in excess of 50%!**

Why continue to pay a penny more than you have to. We'll help you keep more of YOUR money and make sure you're not being overcharged.

We do all this and never ask you to pay us for our valuable service. That's right, not one of our clients have ever written a check to Avion Energy. No one has ever pulled a credit card out of their wallet to pay us!

We provide a **Free Service** to you and the end result is you put more money in your pocket by not paying your current energy provider the high rates you're paying right now!

**You're thinking - What's the catch?
How can we do this for you without asking you for money?**

Not only do we negotiate best pricing for you, we negotiated a broker fee from the energy supplier so YOU don't have to pay us.

You're familiar with this concept – the real-estate industry works the same way. You use the services of a realtor without pulling out the checkbook to pay them. It's only if the realtor puts a buyer and seller together in a mutually agreeable transaction that a broker fee is created. The broker fee is always paid by the seller. Same thing here – We'll do all the work to find you the best energy pricing. If you're satisfied with the savings that we negotiate for you, we'll arrange for the documents to be prepared and assist you in the switch to a better – lower cost energy provider. Only then do we get paid and we are paid by the seller – the energy provider. We maximize your savings by not asking you to pay for our valuable service.

We're well connected! We have relationships with top notch energy providers approved and licensed in the States where we do business.

A lower price – money you're spending now that could stay in your pocket – **is just a phone call away!**
